

# **\$UBQ Utility Token Whitepaper**

**Revised Release Date:** June 16, 2026 — Version 1.1

**Initial Release Date:** May 30, 2026 — Version 1.0

## Authors:

- **Nathan Wosnack:** Founder & CEO
- **M.J. Phillips:** CTO/CISO
- **Blake Anderson:** Advisor
- **David Simpson:** Investor

## Abstract

The facilitation of Real World Asset (RWA) management—encompassing the minting of property records, secure data logging for title companies, and driving B2B real estate and aviation processes via Web3 decentralized applications (dApps)—constitutes a massive segment of enterprise transactions demanding immediate technological modernization.

Recent industry developments have exposed systemic vulnerabilities, highlighting urgent needs for transparency and rigorous regulatory compliance. The introduction of the \$UBQ Digital Tool within the CipherBPA (formerly NFTitle Network) ecosystem signifies a critical paradigm shift. By providing a secure, peer-to-peer routing infrastructure for directly registered digital assets, \$UBQ promises exponentially faster transaction settlements, drastic cost reductions, and enhanced cryptographic security. This whitepaper outlines how \$UBQ serves as the foundational software utility token that revolutionizes title management, streamlining transactions without acting as a currency or investment contract.

---

## Introduction

The global real estate industry currently operates under the crippling weight of antiquated title processes. Cumbersome physical paperwork, opaque fee structures, and prolonged settlement times plague buyers, sellers, and title companies alike. Recognizing this systemic inefficiency, UBITQUITY, Inc. introduces \$UBQ: a unified utility token engineered to power a transformative suite of solutions, including the CipherBPA network, DeedAlert, and the Title Plant+ ecosystem.

Built natively on the highly scalable XPR Network, \$UBQ slashes operational overhead and introduces unprecedented transparency to title processes. By consolidating disparate legacy ecosystem tokens into a single, unified digital asset, \$UBQ optimizes ecosystem liquidity and serves as the exclusive tokenomic fuel for Ubitquity's enterprise infrastructure.

Transparency is foundational to this architecture. Every transaction routed through \$UBQ is cryptographically etched onto an immutable blockchain ledger, establishing an irrefutable, time-stamped record accessible only to authorized, fully vetted parties. \$UBQ operates strictly as a software routing mechanism and rebate access tier, permanently erasing the operational shadows that have long loomed over traditional real estate and title workflows.

---

### Tokenomics & Technical Specifications

To ensure maximum efficiency and predictability, the \$UBQ token operates with a strictly capped supply and precisely defined smart contract parameters.

| Specification        | Detail        |
|----------------------|---------------|
| Token Name           | \$UBQ         |
| Blockchain           | XPR Network   |
| Smart Contract       | tokencreate   |
| Precision (Decimals) | 8             |
| Maximum Total Supply | 555,555,555   |
| Launch Price         | \$0.00242 USD |

|                            |                                                                    |
|----------------------------|--------------------------------------------------------------------|
| <b>Consolidation Ratio</b> | Pending community consensus (Target: July 1, 2026 vote or earlier) |
| <b>Live Exchange</b>       | Alcor V2 AMM Swap Pools                                            |

#### **Official XPR Network Ecosystem Accounts:**

- **WebAuth Username:** ubitquity1
- **Official Burn Address:** token.burn
- **BlastPad Locking Pools:** 871, 880, 882

**Note:** UBITQUITY, Inc. will not create derivative or wrapped versions of the \$UBQ token. Participation in the token migration is strictly voluntary. Exact fiat launch values have been mathematically preserved through the impending consolidation ratio to ensure equitable migration for all ecosystem participants.

---

## **Vision & Strategy**

Our core objective is to build and maintain an innovative Blockchain-as-a-Service (BaaS) platform that serves both the legacy real estate industry and modern enterprise clients through the combined power of Web3 technologies.

### **Growth and Market Expansion**

- **Geographical Expansion:** Partnering with local municipalities, government agencies, and global financial institutions to standardize blockchain real estate records.
- **Market Diversification:** Extending BaaS solutions beyond enterprise giants to small-to-medium real estate brokerages and emerging Real World Asset (RWA) verticals.

- **NFT Platform Development:** Upgrading CipherBPA to offer modular solutions for the digitization, fractionalization, and management of real estate assets as non-fungible tokens.
- 

## Technology Advancements

- **AI Integration:** Utilizing cutting-edge NEURA (AI LLM infrastructure) to automate workflow processes, accelerate data analysis, and execute predictive modeling for deed fraud detection.
- **Interoperability & Scalability:** Guaranteeing seamless API bridges with third-party legacy applications while maintaining sub-second, feeless operations natively on the XPR Network.

## Regulatory Compliance & Security

- **Strict Digital Tool Classification:** Adhering strictly to the March 17, 2026, SEC/CFTC Joint Interpretation of \$UBQ as a "Digital Tool."
  - **ALTA Best Practices:** Maintaining unwavering compliance with the American Land Title Association's established frameworks.
  - **Data Privacy (SOC 2):** Utilizing encrypted IPFS and Google Cloud Platform (GCP) storage architecture, aggressively driving toward full SOC 2 Type 1 Certification.
-

## Products & Ecosystem Suite

The \$UBQ token is the operational lifeblood connecting Ubitquity's diverse suite of enterprise tools:

- **CipherBPA:** \$UBQ provides the routing force for this tamper-proof property record platform. It facilitates API integrations and secure data logging, accessible exclusively to authorized parties verified under strict KYC/KYB/AML protocols by our UK-based compliance partner, Shufti.
- **CryptoListing:** Purchase luxury homes, condos, and commercial property securely using digital assets. Fast, borderless, and revolutionary property ownership is here.
- **DeedAlert:** A localized monitoring solution to combat title fraud. \$UBQ expenditure grants users priority deed activity alerts, enhanced reporting dashboards, and decentralized governance voting for future system upgrades.
- **DocuOracle:** Tokenize Your Documents. Transform Files into Web3 Data. Empowering real estate title agencies, aviation escrow firms, underwriters, and end-users. DocuOracle uses the NEURA AI LLM by UBITQUITY to instantly tokenize files into verifiable, immutable assets on the XPR Network.
- **Ransomware Preventor:** Proactively disrupt attackers at every stage of the ransomware attack chain, safeguarding millions in escrow funds and physical asset registries natively within the Workspace. Recursive Self-Improvement. Our behavioral engine continuously learns from mitigated attacks. By employing adaptive baselining, the system autonomously updates its local hash threat-detection algorithms to outpace evolving RWA data extortion tactics.
- **SmartEscrow Bridge & dApp Suite:** Non-custodial, Web3-native escrow software tailored for title companies, engineered to operate smoothly within current SEC/CFTC regulatory guidelines.

- **Telegram Tipbot:** Telegram Tip Bot for XPR Network. Defaults exclusively to \$UBQ, \$NGOV, and \$NDAOXPR (by nDAO partner) utility tokens. Available only on official UBITQUITY and nDAO Telegram groups/channels. The dApp is open sourced and freely available for auditing, review, and forking from the UBITQUITY, INC GitHub account.
  - **TitleGuard AI:** An enterprise-grade AI scanner that rapidly audits public datasets and property records to identify liens, forgeries, encumbrances, and chain-of-title gaps.
  - **Title Plant+:** Powered by \$UBQ, this decentralized gateway to comprehensive property databases circumvents centralized intermediaries, lowering costs and accelerating title searches.
  - **Web3Auditor:** An advanced financial verification tool enabling underwriters, escrow professionals, and title agents to securely validate client Proof of Funds.
  - **Web3Msngr:** A decentralized secure communication engine featuring WebRTC Voice Calling, encrypted profile backups, and a guaranteed-delivery SQLite Post Office engine.
  - **Web3Notary:** Establishes immutable digital evidence by securely anchoring user data to the blockchain, ensuring records are tamper-proof and independently verifiable.
- 

## Ecosystem Support & Utility Token Locking

To comply with federal guidelines regarding digital tools and to eliminate legacy "staking for yield" concepts, \$UBQ utilizes a purely utility-driven locking mechanism via BlastPad.

Locking \$UBQ directly supports cryptographic protocol stability. In return for providing this network security collateral, participants unlock algorithmic ecosystem rewards:

- **Scalable Service Rebates:** Percentage-based fee reductions processed by Trustless Agents.

- **Platform Tier Benefits:** Zero-fee software routing capabilities for heavy enterprise lock-ups.
- **Governance Weight:** Enhanced voting power within the nDAO ecosystem.

**Three BlastPad utility-driven locking mechanisms are currently live:**

**Short Term:**

- Lock-in Period: **30 Days**
- Pool Expiration: **Aug 26, 2026, 03:00 PM** [90 Days]
- \$UBQ Allocation: **4,051,133.01331632** [includes bonus pool]
- Pool ID: [871](#)

**Medium Term:**

- Lock-in Period: **90 Days**
- Pool Expiration: **Dec 10, 2026, 09:00 PM** [190 Days]
- \$UBQ Allocation: **2,575,024.61797192** [includes bonus pool]
- Pool ID: [882](#)

**Long Term:**

- Lock-in Period: **180 Days**
- Pool Expiration: **Jun 11, 2027, 04:00 PM** [365 Days]
- \$UBQ Allocation: **6,124,967.92324439** [includes bonus pool]
- Pool ID: [880](#)

**Disclaimer:** *These rewards are programmatic operational rebates. They are strictly not dividends or profit-sharing mechanisms. Users should have no expectation of profit based on the managerial efforts of Ubitquity, Inc.*

---

**Alcor Liquidity Pools:**

Several liquidity pools exist for \$UBQ on Alcor Exchange (DEX).

The top ones managed by UBITQUITY, INC are:

- **\$XPR / \$UBQ** [0.3% fee]
- **\$XUSDC / \$UBQ** [1% fee]
- **\$DKT / \$UBQ** [1% fee]
- **\$EASY / \$UBQ** [1% fee]

... plus other smaller pools. Note: Pool allocations will increase/decrease based on a number of market factors, including risks, and uncertainties. \$UBQ Community members are encouraged to participate in creating their own staking pools. DKT and EASY pools shall have funds re-added (not deducted) and 100% of fees re-added.

### **Alcor Farms:**

Alcor Farms are coming to \$UBQ in the month of June, 2026. Details will be provided in the next iteration of this whitepaper. Strategic decisions on the Alcor Farms for \$UBQ are currently under discussion by UBITQUITY staff and specific expert community members who have and are currently running successful farms.

### **Legacy Token Migration Mathematics**

The transition from the fragmented legacy ecosystem to the capped 555,555,555 \$UBQ supply relies on a mathematically sound, push-structure migration. The final total circulating supply generation is calculated using the following consolidation formula:

$$\Delta_{UBQ} = \sum_{i=1}^n \left( \frac{L_i}{C_r} \right) \leq S_{max}$$

Where  $\Delta_{UBQ}$  represents the final minted supply of the new token,  $L_i$  represents the verified legacy token balance of individual user  $i$ ,  $C_r$  represents the final community-voted consolidation ratio, and  $S_{max}$  is the hard-capped maximum supply of 555,555,555.

---

## 2026 Roadmap: Migration & Deployment

### Q2 2026 - Infrastructure & Preparation

- Finalize legacy ecosystem token blockchain snapshots.
- Complete Alpha testing of the new **tokencreate** smart contract.
- Deploy user-friendly migration portals and establish automated burn-wallet routing mechanics.

### Q3 2026 - Official Disbursement & Market Launch

- **May 27, 2026:** Official, legally compliant market launch of \$UBQ tokens. ✓
- **May 27, 2026:** Establish V2 AMM Swap Pools on the Alcor Exchange. ✓
- **May 28, 2026:** Activate Utility Token Locking mechanism via BlastPad. ✓
- **June 2026:** Roll out full utility token locking tiers via BlastPad. ✓
- **June 2026:** Integrate \$UBQ Utility Token into Web3Apps and CipherBPA Suites ✓ + ⌚
- **July 1, 2026 (11:11 PM EDT):** Final lock of legacy migration metrics and consolidation framework based on community consensus. (Note: Deadline extensible pending consensus. A 51% consensus must be met on or before the variable deadline). ⌚

### Q4 2026 - Global Expansion

- Achieve full, stable deployment of the unified \$UBQ ecosystem. ⌚
- Expand native application support across Android, iOS, ChromeOS environments. ⌚
- Execute global strategic partnerships with international title networks/municipalities. ⌚

---

## Legacy Token Migration & Distribution Policy

**WARNING:** It is strongly advised that users **DO NOT burn legacy tokens until the final migration metric** has been unanimously agreed upon by the community, which shall happen on or before July 1, 2026.

### Migration Protocol:

- **Burn Process:** Users send legacy tokens to [token.burn](#) including their WebAuth receiving address in the transaction memo.
- **Consolidation:** Legacy assets are merged at the finalized ratio to fit the strict maximum supply cap.
- **Disbursement:** Newly minted \$UBQ is transferred via the XPR Network's batch transfer feature directly to user self-custodial wallets.
- **Incentives:** Future loyalty spins and Private Purchase referral bonuses will be distributed exclusively to active ecosystem participants locking tokens in BlastPad.

---

## \$UBQ Private Sale opportunities

Current discounted offers on \$UBQ Utility Tokens are as follows:

- **50% off \$UBQ** until June 30, 2026 @ 11:59 PM EDT. Min: \$20/USD purchase. Send to WebAuth: **ubitquity1**
- **LP Restoration/Stability Offer: 25% discount plus a 5% bonus on \$UBQ** until July 16, 2026 @ 11:59 PM EDT. 50% of the funds will go towards the \$UBQ Alcor Liquidity Pools operated by UBITQUITY. Simply send funds with details in the memo.
- **Summer Fundraiser: 50% off plus receive a 50% bonus on \$UBQ** until July 31, 2026 @ 11:59 PM EDT. Half of the funds donated will be sent to the charity of the buyer's choice. If the buyer does not choose one, funds will default to the UBITQUITY primary campaign beneficiary. See: [\\$UBQ Summer Fundraiser | Ubitquity, Inc.](#) Send to WebAuth: **ubitquity1**

## \$UBQ Alcor opportunity

- **LP Restoration/Stability Offer: 5% bonus on \$UBQ** until July 16, 2026 @ 11:59 PM EDT. No minimum purchase. 50% of the funds go towards the \$UBQ Alcor Liquidity Pools by UBITQUITY. Buyer must allocate to the 1 or 6 month, or 365 day BlastPad allocation. Proof *must be* provided via a support ticket: [support.ubitquityx.com](https://support.ubitquityx.com).
- 

## Legal & Compliance Disclosures

- **Digital Tool Classification:** \$UBQ strictly qualifies as a "Digital Tool" as defined under the March 17, 2026, SEC/CFTC Joint Interpretation. It is engineered for pure ecosystem utility, not as a fiat currency alternative or investment contract.
- **No USD Value Guarantee:** \$UBQ is a floating-value utility asset and is explicitly excluded from the definition of a "Payment Stablecoin" under the GENIUS Act of 2025.
- **Not An Offer To Sell Securities:** The information contained in this whitepaper does not constitute an offer to sell securities or the solicitation of an offer to buy securities. \$UBQ's value is intrinsically linked to programmatic software operation. Users acknowledge there is no expectation of profit resulting from the managerial efforts of Ubitquity, Inc.
- **User Interface Exemption:** Ubitquity operates strictly as a "Covered User Interface Provider" in accordance with the April 13, 2026, SEC Statement. Ubitquity provides objective, non-discretionary software routing to the XPR Network via self-custodial wallets and is NOT registered with, nor regulated by, the SEC or CFTC as a broker, dealer, or exchange.
